Dedication 2005

Russell Folger

The Class of 2005 has chosen to dedicate this year's edition of our yearbook to someone who truly embodies great strength, courage, and faith. He, as we all know, has continued to inspire us all as he handles his battle with cancer with true grace and an incredible spirit. But that is only a fraction of who Russell is. His determination to enter medical school at his age was astonishing to his younger colleagues who constantly mistook him for a professor. But he quickly won us all over with his positive outlook on life and his infectious smile. He is truly loved by our entire class and he will always be an inspiration to us as we continue in our training. His dedication to his son, to his work, to his classmates will be forever remembered by the class of 2005. Now as graduation is upon us and we all go our separate directions, Russell please never forget, you will always be a member our class and will forever be in our hearts and prayers.

"He continually surprises me with his positive attitude and represents many of the wonderful humanistic traits we all strive to embody as physicians."

- Frank Killian MSIV

Acknowledgements

Dr. Julia Cruz

Mama Cruz Exemplifies the meaning of student advocate. She took over the daunting task of Class Mentor for the class of 2005 almost halfway through our medical education and made tireless efforts to know each of us on an individual level. Through class dinners or parties at her home to small group breakfast meetings just to chat, she made sure our ideas, comments, and concerns were not left unheard by the administration. She has been a mentor, cheerleader, and friend. We love you, Mama Cruz!

Dr. James Peacock

Dr. Peacock has been described as "the Heat," which should be considered a very high honor to any professor. He is quite possibly one of the most brilliant physicians any of us have had the pleasure to work with and yet he is humble, non-threatening, and above all simply loves to teach and encourages "thinking outside the box." He is an amazing physician and person and he serves as a wonderful role model for future physicians.

Academic Computing

There have been many facts that we have learned in medical school but none more important than when we all realized we would not be here ready to graduate if it were not for the wonderful staff of Academic Computing. Thank you all for your many hours spent solving problems created by our computer illiterate class. You are truly appreciated.

in-tro-duc-tion *n.* 1. The act or process of introducing or the state of being introduced. 2. A means, such as a personal letter, of presenting one person to another. 3. Something recently introduced; an innovation. 4. Something presented in beginning or introducing something, esp.: a. A preface, as to a book. b. *Mus.* A short preliminary movement in a larger work. c. A basic introductory text or course of study.

Please use this word in a sentence.

1. Allow me to introduce my daughter; she's a medical student at Wake Forest.
2. Gross anatomy will be your introduction to the human body.
3. Always be sure to introduce yourself to the patient.
4. Consider buying "Robbins" as an introductory text for pathology.

Welcome to *Gray Matter 2005*, a comma in our career spanning paragraph of introductions.

Four years of medical school provides a body of knowledge and a new vocabulary unique to the physician. We are given the opportunity to explore, often in greater detail than we desire, the workings of the heart, lungs and kidneys. We carve through layers of skin, fat, nerves and vessels that most of our friends and family cannot even imagine. From the doors of NCBH, we leave changed. We are drenched with knowledge and through that we meet its breadth, limits, applications, and its ever present companion, ignorance. As Dr. Adams often says, "The kidney is smarter than you are."

Through the eyes of medicine, we are reintroduced to illness and death. This changes how we see them, especially in respect to our closest loved ones. No longer can we deny the power of cancer or the threat of sepsis yet we have also learned that illness is a spectrum. The name of the condition and the prognosis are often independent of each other.

Along this journey we have all met reality—the reality that we cannot save our patients from themselves, the reality that cost matters and that red tape is thicker than it sounds, and the reality that fatigue and hunger are competitive antagonists of compassion and reason.

As the class of 2005, we will go into internship having been introduced widely, having been changed by those introductions and with the knowledge that each day we will encounter something new or something forgotten. Our greatest hope and goal is that, through the vocation that is medicine, we will sculpt these introductions into that illusive trait that is experience.

“Experience is not what happens to a man; it is
what a man does with what happens to him”

— Aldous Huxley

Introduction written by Megan Austin

*"If I were an eye
movement, I would
be a smooth pursuit."
- Wood Gibbs*

*"Is anyone available to
give a tour?"*
- Tammy Strickland

*"Sometimes wrong, but
never in doubt."*

-Wade Wilkerson

"NOTHING HEALS LIKE
THE CUT OF STEEL"
- ANONYMOUS SURGEON

Croquet Party 2004

Top 5 Things Said During Colonoscopy:

1. Hey doc, let me know if you find my dignity.
2. Can you hear me **NOW**?
3. You know in Arkansas we're now legally married.
4. If your hand doesn't fit, you must quit!
5. Could you write a note for my wife saying my head is in fact not up there?

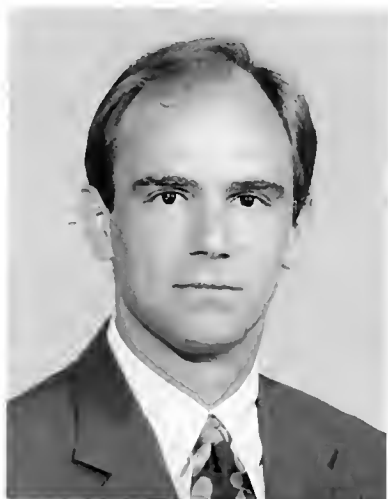

Now...

... and then

Award for Teaching Excellence

Dr. David Riddle is an assistant professor in the department of Neurobiology and Anatomy. During our first two years, he is an integral part of the core biomedical science curriculum and was responsible for providing instruction in microanatomy and embryology. Dr. Riddle is a patient, energetic and dedicated classroom teacher. In addition to being a wonderful classroom teacher, Dr. Riddle also has an active research program investigating the regulation of axonal and dendritic growth and the formation and maintenance of neuronal circuits in the developing, adult and aging central nervous system. For his dedication to teaching, the Class of 2005 would like to honor him with the Award for Teaching Excellence. Thank you Dr. Riddle for being such an exceptional teacher! For in the words of Henry Adams:

*A teacher affects eternity,
he can never tell where his influence stops*

Charles B. Clark Memorial Award For Outstanding Service to the Senior Class

Dr. Julia Cruz has been a member of Wake Forest for more than two decades, after completing residency and fellowship here and now serving as an associate professor in Hematology and Oncology. Her dedication to our institution is apparent as she serves on countless committees and is responsible for organizing the student Heme Onc curriculum. Through innovative teaching methods, Dr. Cruz makes hemolytic and non-hemolytic anemias seem so simple. (Really, who can forget her demonstration of red cells being "trapped" during splenic sequestration?) Not only has she dedicated her life to teaching, she also accepted the challenge of serving as mentor to the Class of 2005. Since she took on the role, "Mama Cruz" has welcomed her 110 "children" into her home, office and heart. Over the past two years, she has been the heart of the Class of 2005. As we rotated on the wards, it was not uncommon for Dr. Cruz to drop in with a smile and hug. As we teetered on the edge of malnutrition from the "medical student diet," she welcomed us into her home and filled us with authentic Cuban cuisine. As we applied for residency, she was available at a moments notice to listen to our problems and to offer advice and encouragement. Most importantly though, Dr. Cruz is a model of integrity to which we should all aspire. Providing care to some of the sickest and most complex patients in the hospital, she always greets them with a warm smile and open heart. Her kindness, compassion, and devotion to patient advocacy have been critical to our growth from students into physicians. Thank you, Dr. Cruz, for your hard work and dedication! The Class of 2005 truly appreciates you.

Faculty Recognition Awards

Each year faculty members in basic and clinical sciences are honored with the "Faculty Recognition Award." Students from each year are asked to nominate professors who have made an impact on their lives in some manner, whether it be through education, leadership, or compassion.

INTERVIEWING

GOING HOME AT NOON

Match Day

Finally we're almost there....

Post Boards Party

June 18, 2004

You have a cough? Go home tonight, eat a whole box of Ex-Lax - tomorrow you'll be afraid to cough.
- Pearl Williams

Most likely to be seen in sleeveless scrubs - Jesse Noboa

Most likely to know all the US presidents - Melissa Mizesko

Most likely to have undue influence on the ladies - Sam Davis

Most likely to fall asleep in front of a patient - Jaime Cheung

Most likely to fall asleep in front of an attending - Jesse Noboa

Least likely to get upset about being sued (or anything else) - Win Boon

Most likely to leave the field of medicine and go into auto repair - Kelly Hopper

Most likely to use the phrase "More nervous than a long tailed cat in a room full of rocking chairs" - Wood Gibbs

Most likely to be hitting us up for campaign contributions in 10 years - Sam Turner, Kevin Shute, Erik Condon

Most likely to ask a patient if everything was alright "down there" - Wade Wilkerson

Most willing to show chest hair under scrubs - Geoff Nuss, Dino Massoglia

Most likely to be the next winner of "The Apprentice" - Frank Killian

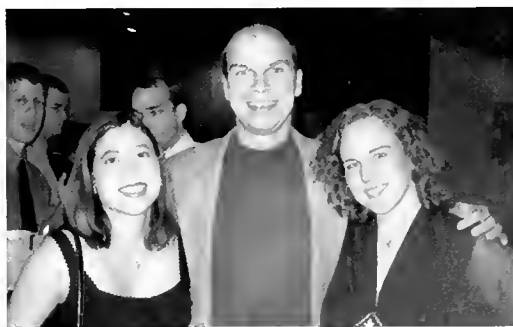

Most likely to wear designer scrubs - Reginald Brown, Joan Garcia

Most likely to succeed and then complain about it - Aaron Hoffman

Most likely to break sterile technique in the OR - Bryan Lusk

Most likely to talk faster than you can think - Saurabh Singh

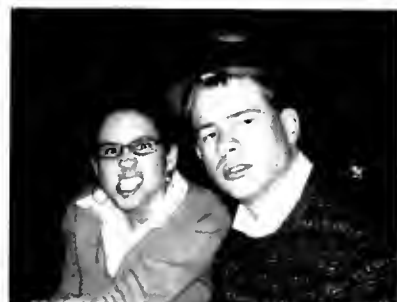

Most likely to jump through hoops for the Class of 2005 - Dr. Julia Cruz

Dr. Wood Gibbs

Dr. Timothy L. Gruebel

Paul, Terry, Robyn, & Robert, thank you for the enormous love, support, and generosity you have given my family during these medical school years. You made these challenging times much easier.

Laura, may our lives always be full of peace, love, and happiness.

Rachel, Christian, and Lillian, you give me perspective, joy, and inspiration. Thank you for keeping the real meaning of life in focus.

Rachel and Dad on their first day of school.

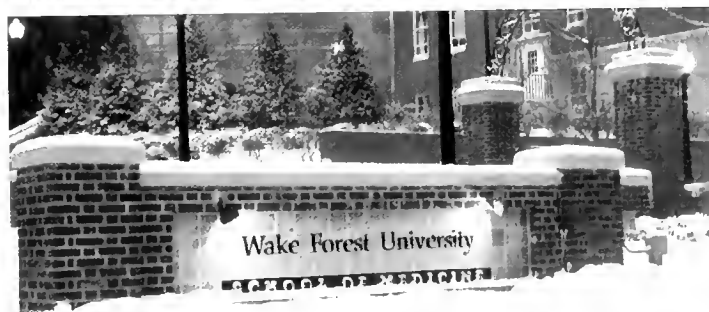

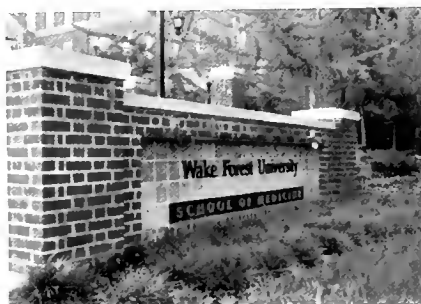

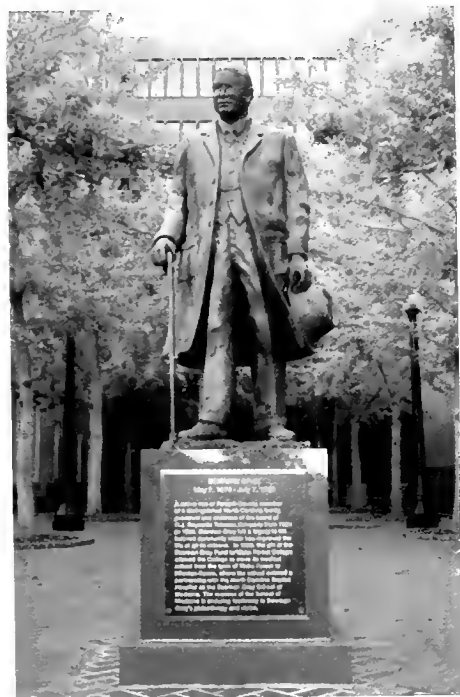

Mom and Dad, thank you for teaching me the value of an education and instilling in me a great work ethic. You enabled me to accomplish this goal.

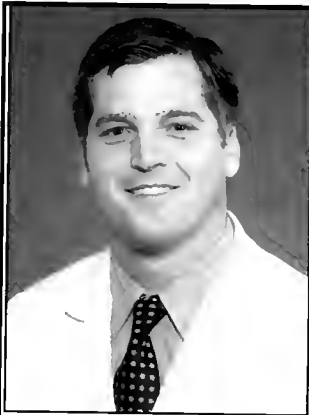

To my wife, thank you for all the encouragement and support you have given me over the last 4 years. I can never repay all the sacrifices you made. We did it together, every step of the way! I love you.

Dr. Sarah Grummer

Dr. Dudley Hammon

Dr. Jason Handler

To my family, thank you for love and support without which none of this would be possible. I love you.

Dr. Joshua Hargraves

Thank you to all those that supported me through school. I couldn't have done without any of you.

Dr. Meggan Harris

Dr. Thomas Holland

Dr. Kyung-Soo Hong

Thank you all for the
love, support, and
sacrifices you made.
But most of all, thank
you for the gift of faith.

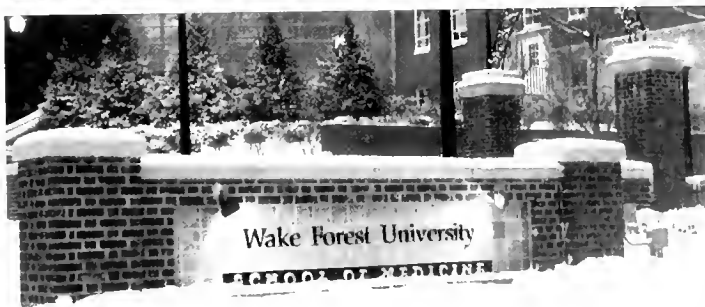

Dr. Kelly Hopper

"Live as if you were to die tomorrow, learn as if you were to live forever" - Gandhi.

Dr. Heather Jones

Dr. Ailisa Kahill

Dr. Melissa Keene

Dr. Frank Killian

Dr. Christopher Kwon

Psalm 27:4- One thing I ask of the LORD, this is what I seek: that I may dwell in the house of the LORD all the days of my life, to gaze upon the beauty of the LORD and to seek him in his temple.

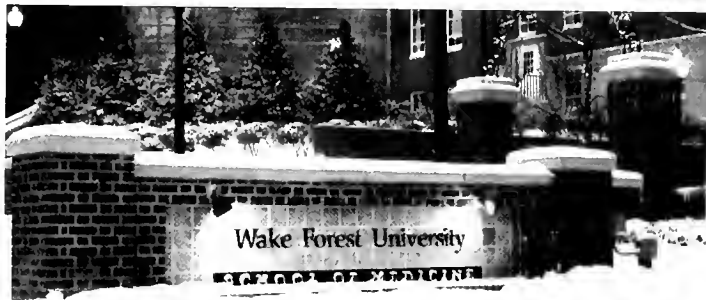

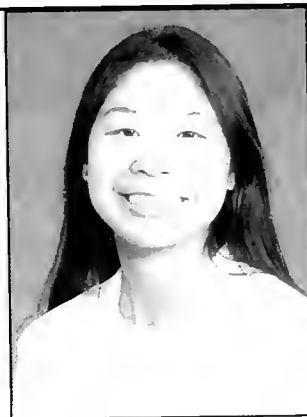

Dr. Smita Laad

Dr. Patrick Laguerre

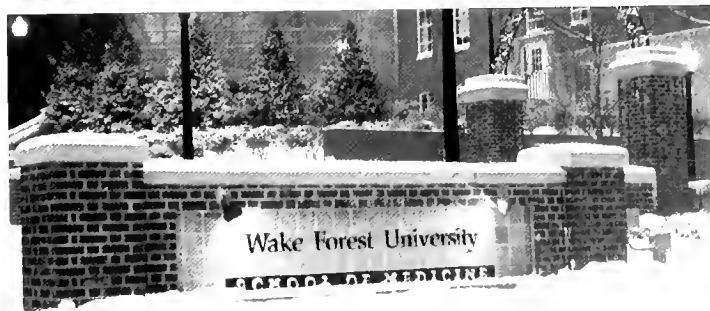

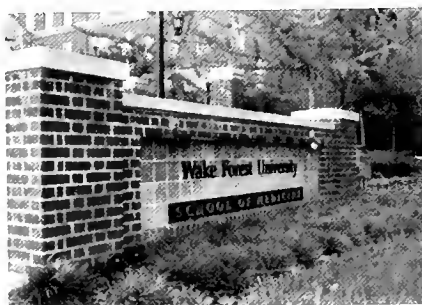

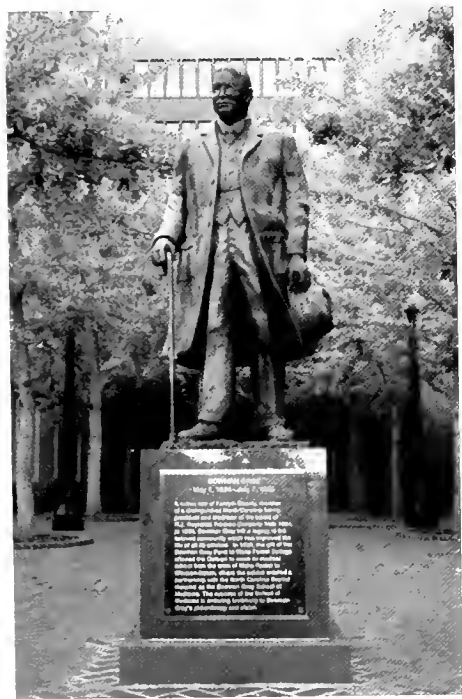

Dr. Yvonne Lai

To my family & friends,
Thanks for all your love and support!
I love you all.

Dr. Jennifer Landes

Dr. Daniel Leung

"He is no fool who gives what he cannot keep to gain what he cannot lose." - Jim Elliott

Thank you Mom, Dad, Henry, and Karis – for your endless love, prayers, and encouragements throughout this journey.

"Friendship is unnecessary, like philosophy, like art...it has no survival value; rather, it is one of those things that give value to survival." - C.S. Lewis

Dr. Niles Lodhia

Dr. Ying Li

Dr. Oliver Varban

Dr. Elizabeth Lundeen

Dr. Bryan Lusk

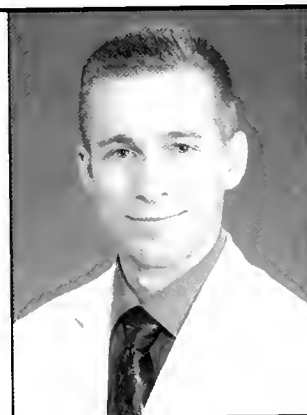

"With gratitude to God, my family, and all the friends who were there for me along the way. I love you all."

Dr. Collin Lynn

Dr. James Alex MacDonald

Dr. Dino Massoglia

Dr. Melissa Mizesko

"Always thinking ahead –
thanks Mom and Dad."

"Bea – the worry dog.
Dave and Adrienne – thanks
for looking after her so
well."

"What lies behind us and
what lies before us are tiny
matters compared to what
lies within us." - Ralph
Waldo Emerson

To all my friends – I never
would have made it this far
without you!

Dr. Kelley Mondì

Cole and Riley.
Momma loves you!

Home sweet home.

Dad, Mom, Kim and
Tony – I'm so blessed
to have each of you in
my life.

Thanks for all the fun
times!

Honeymooning in Italy with my better half.
6 years later, I love you even more, Matt!

Fried turkey and Tino will
never be the same. I'll miss
you guys!

Dr. Arta Monjazez

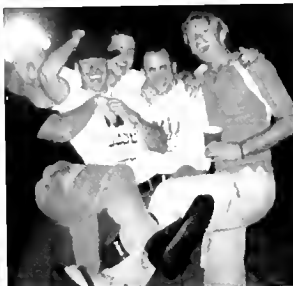

Dr. Benjamin Morley

Dr. Sara Nelson

Dr. Erin Plosa

Dr. James G. Prempeh

"Though I could pride myself in battles won... in every victory, let it be said of me that my source of strength and my source of hope is Christ alone."

To my family - for all the love, support, for having faith and praying when I didn't, thank you. **I love you all so much!!**

Dr. Saud Rahman

Dr. Mehul V. Raval

"It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat."

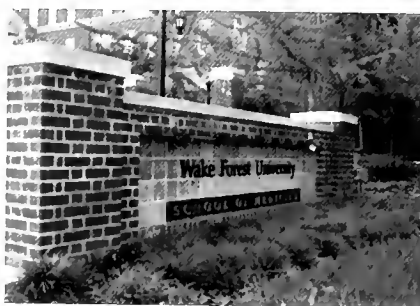

Theodore Roosevelt (April 23, 1910)

Dr. Heather Reed

Dr. Celine Richardson

Dr. Saulette Roberson

Dr. Matthew Rogalski

The wife and I on hallowed ground

Where it all began...Thanks Mom, Dad, Nate, John, Mark! Much love!

Good times, better friends

Memories to treasure...
what a crew!

My cats, my sanity break

Dr. David Rogers

Dr. Ashley Rush

"Don't you sit upon the shoreline and say you're satisfied, choose to chance the rapids and dare to dance the tides."

Thank you to those who I love so very much for your friendship, support, and at times, humor, that have enabled me to live by this motto.

Dr. Shad Saunders

Jennilyn... You are the love of my life. Thank you for your support and hard work. We make a great team. I love you

Addison... Thanks for always making me smile. Daddy loves you

Making mischief in the snow

'Jenni and Addi, Dad and Mom, Terry and Debbie, I couldn't have asked for better examples. Thanks for your love and support. I love you all.'

My "girls" on the Carolina Beach

What a catch!

Mom and Dad – Thanks for teaching me to dream big and work hard. I love you both

Dr. Latasha Sellers

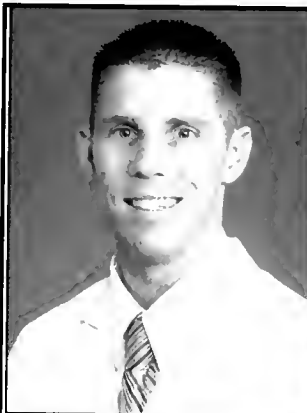

Dr. Binit Shah

Dr. Lisa Sheehan

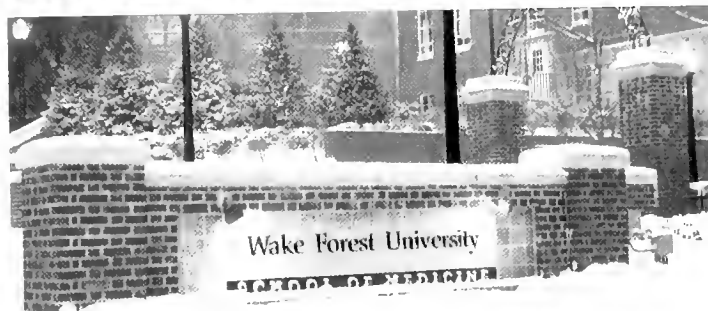

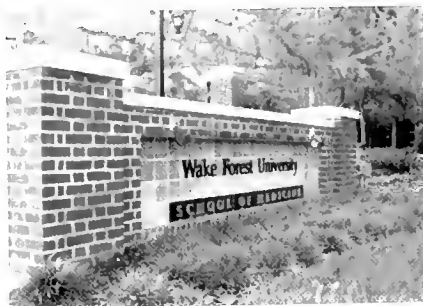

Dr. Kevin Shute

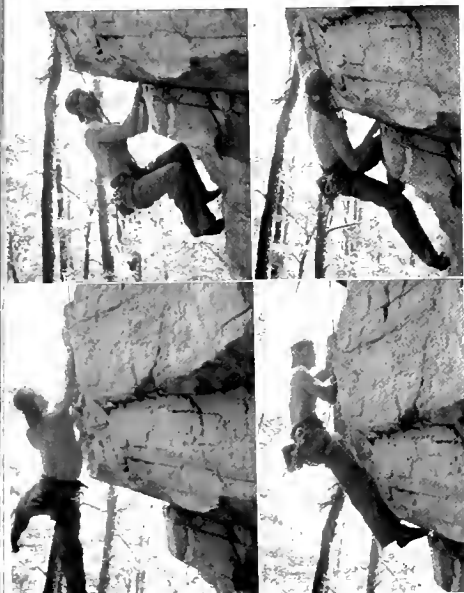

"To my closest friends, without whom I would never have made it past the classroom years,
To Mom and Dad, without whom I would never have made it past teething.
To Emily, without whom I would never have been able to see my future,
And to Tiger, without whom I would have needed a therapist!
Thank you all for making this dream come true!"

Dr. Shadab Siddiqui

Dr. Alan Silberberg

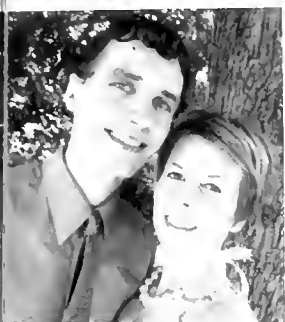

Dr. David Simmons

Dr. Saurabh Singh

Dr. Bryan Smith

Dr. Suzanne Steele

"Be joyful always; pray continually; give thanks in all circumstances, for this is God's will for you in Christ Jesus."
-1 Thessalonians 5:16-18

Quotes Heard Around the Hospital...

"The patient had a good prognosis, until she died."

"Urine is the essence of life."

"You know, I am crazy. Not in a bad way, just in a casual sort of way."

"I am patient to a point. But after that I become a maniac."

"I just keep repeating myself here. Just like a Beatles record, only less entertaining."

"So who you gonna call? GI-like yesterday."

*Formerly, when religion was strong and science weak, men
mistook magic for medicine; now, when science is strong and
religion weak, men mistake medicine for magic.*
-Thomas Szasz, M.D.

Medical Record Blunder:
The patient's past
medical history has been
remarkably insignificant,
with only a forty pound
weight gain in the past
three days.

Diagnosis By Joel Brouwer

The doctor says, *Think of it this way. Your insides are like the jungle at night: warm, noisy, rank with mango, and but for some holes drilled through the sky by stars, wholly dark. A river floats through you on its back, shivering with silver piranhas. Banyan roots claw its face with thirsty fingers and draw black water up to the leafy canopy, where the last honeysuckle vireo on earth has sunk her beak into the single living pygmy anaconda, which in turn has the bird half wrapped in its flexing grip. Only one will live. It's too soon to say.*

FAVORITE PLACES TO SLEEP IN THE HOSPITAL:

1. THE QUIET SIDE OF THE BAT CAVE WITH THE HEATER TURNED UP
2. PEDS CALL ROOMS
3. MEDICINE OR SURGERY GRAND ROUNDS
4. IN THE CHAIRS BEHIND THAT LAST ROW OF COMPUTERS IN THE LIBRARY....BEHIND THE POST
5. IN THE RESIDENT CALL ROOMS
6. SLEEP?? WHO GETS TO SLEEP??

"I became a doctor for the
same four reasons
everyone does: chicks,
money, power, and
chicks."

- Dr. Cox on *Scrubs*

A man told his doctor that he wasn't able to do all the things around the house that he used to do. When the examination was complete, he said, "Now, Doc. I can take it. Tell me in plain English what is wrong with me." "Well in plain English ", the doctor replied, "You're just lazy." "Okay," said the man. "Now give me the medical term so I can tell my wife."

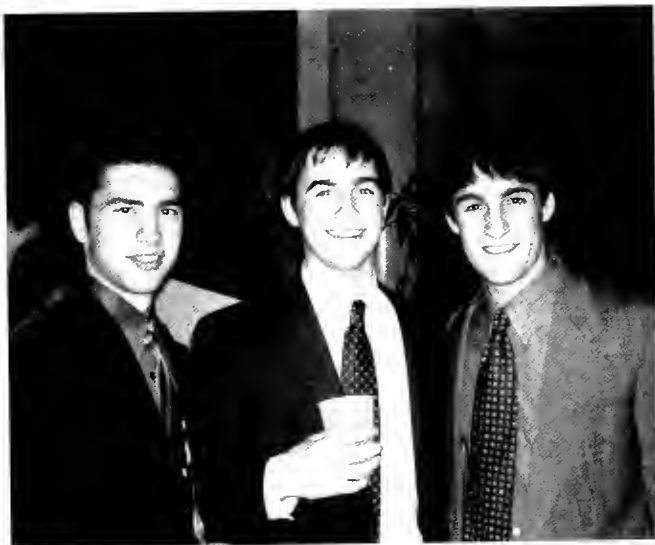

"You don't need your cephalic vein. God made it for pacemaker placement." - Dr. Mark Mitchell, Electrophysiologist.

Favorite Non-Medical Uses for Your Stethoscope:

- 1. Ear Plugs*
- 2. Flipping the end through the
earpieces like a ball and cup game*
- 3. A percussion instrument*
- 4. Dog toy (applies to fourth years
only!)*
- 5. Wake up people who are sleeping
through lecture*

The New England Journal of
Medicine reports that 9 out of 10
doctors agree that 1 out of 10
doctors is an idiot.

“Put blinders on those things that
conspire to hold you back,
especially the ones in your own
head.” - Meryl Streep

*The plainest sign of wisdom is
a continual cheerfulness: her
state is like that of things in the
regions above the moon, always
clear and serene.*

—Michel de Montaigne

**f taking vitamins doesn't keep
you healthy enough, try more
laughter: The most wasted of all
days is that on which one has not
laughed.**

—Nicolas-Sebastien Chamfort

A pessimist is one who makes difficulties of his opportunities and an optimist is one who makes opportunities of his difficulties."
 Harry Truman

"There is no medicine like hope, no incentive so great, and no tonic so powerful as expectation of something better tomorrow"
 - Orison Sweet Marden

*"To be good is noble; but to show
others how to be good is nobler and
no trouble."*

- Mark Twain

Actual Transcription Errors:

1. The patient had a baloney amputation
2. She is numb from the toes down
3. Discharge status: Alive but without permission
4. When she fainted her eyes rolled around the floor

A flood of memories reverberate from my shrinking Hippocampus as I go through the Student Rollbook for your Class of 2005. The Student Rollbook pictures go back to the Orientation Week before the first day of classes. One of the great perks of my job is watching people develop and change over the four years of medical school. I want you all to know that it has been a tremendous privilege for me to serve and teach you individually and as a Class. It was especially gratifying to share this experience with you during the earliest period of your maturation in medicine.

Every face in the Rollbook evokes a memory and more than a few of your faces a nostalgic story or two. I can fondly remember each and every one of you during those first 12 weeks of school in the Anatomy lab. I can also remember seeing you repeatedly over four years during the Neuro Topic, in Small Groups and SPAs, in the hallways and as you finally finished in Phase 5. Some of you I know extremely well but I know you all well enough to say that as an aggregate this is truly an exceptional Medical School Class. So much has changed and matured within each of you since the first time you entered the Anatomy Lab. All of you, without exception, have responded well to the challenges of medical school by adapting again and again to a very dynamic environment with severe and changing demands. I am excited to congratulate each and every one of you on the race you have run and encourage you in the adventure that lies ahead.

It's now time to cast the seed to the wind, to scatter your class across the country and perhaps the globe. I have trusted my health and literally the lives of my loved ones to some of my former students. It is very likely that many of you will serve me or my family members in this way sometime in the future. I hope to see and know you again in the future in a new way, as a friend and as a colleague and most of all as a highly trusted caring and competent physician. God Bless You All and Never Forget That As Long As I Am Able, I Am Always Available To Help You In Any Way I Can.

Jim Johnson

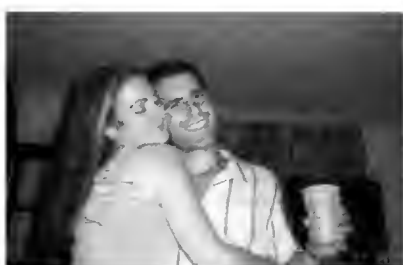

To the Graduates of 2005,

As this new year begins, I look back upon your experiences in the Simulation Lab and Operating Room and I feel confident that all of you are well-trained, disciplined, and above all, enthusiastic about your careers in medicine. We've had fun together, from your very first encounter with Sam in congestive heart failure, to your anticipated "finals" in Phase V Simulation, when it all comes together. You've worked hard, and you've worked as a team. I continue to be impressed at how well you put your minds together in solving problems. That's what we try to teach you in anesthesiology, regardless of your chosen discipline. When things get tough, and you have only moments to think, remember that you were able to help your patients by helping each other. Don't be afraid to speak up and say what you are thinking...chances are that you are right on track!

I wish you all the very best in residency, and don't forget to consider a career in teaching. After all, 'to teach is to learn twice' and in this career, you should always remain a student at heart. Congratulations!

Dr. Mike Olympio
Professor of Anesthesiology
Founder and First Director,
Patient Simulation Laboratory

To The Class of 2005

It is with a great deal of pride and high hopes for your future, that I send you off with wishes for the best the world has to offer you.

You have worked hard, and endured much, in order to receive the title, Medical Doctor (M.D.) You may need to remind your friends outside of medicine, that the M.D. does not stand for "Millions of Dollars" and that the sacrifices you have made (endless studying, lack of sleep, missing important family events, just to name a few) may have led also to another type of M.D. (Mental Derangement), but like me, you could not imagine life without medicine. We are among the Few, The Proud, Oh, sorry that's the Marines.

We are blessed to have the opportunity to share so much of our patients' lives.

We are there when they are born, and when they die, and if we take the time to pay attention, we will find that we get much more from them than they from us. I recently heard someone say that Birth is a beginning, Death is a destination and Life is a journey, so, enjoy the journey. And along the way try to remember the wisdom of one of our former faculty, and one of my favorite professors when I was medical student here, as he lay near death, Dr. Ronald Mack:

"Be honest,

Don't go through life afraid,

And take care of yourself, go to the doctor."

So, live, laugh, enjoy the journey, and come visit sometime!

Brenda Latham-Sadler, M. D.

To the Class of 2005:

As you proceed in life to become important and famous physicians, remember these words of Marlo Thomas:

"If there is one thing I've learned from St Jude, it's that hope can be a medicine, and love can be a cure. And I assure you, those are two things that all of us are qualified to dispense".

Best of luck to you all, Patty Adams

Dear members of the Class of 2005,

Best wishes as you begin the next stage of your medical career.

Always allow your patients and members of the health care team to know you as the kind, caring, compassionate person I have had the pleasure and privilege to know as a medical student.

Warm Regards,

Lynn Snyder

Dear Scholars:

Best Wishes for a long life accented with radiant health and personal fulfillment. May good cheer, good people and good times be your constant companions. And if on rare occasions you experience any insomnia recall Dr. Smith's sure fire antidote; pick up the old Biochem book, open it to any page, read the first sentence and cured you will be.

Sincerely

Peter B. Smith

Dear Class of 2005

It has been indeed a pleasure to have had the opportunity to participate in your growth as young physicians. I continue to be inspired and optimistic about the future of medical care. I congratulate you on your accomplishment. I pray that you will use the experience that you have gained here at Wake Forest University School of Medicine to uplift your patients, your communities and the world. I know that you will always make us very proud. Again congratulations and good luck.

Sincerely

Vernon H. Ross MD, Assistant Professor Anesthesiology

DOBER'S ADVICE, SPECIALLY ASSEMBLED FOR THE CLASS OF 2005

Whenever it feels like the rules have been changed, the rules have probably been changed:

"You never step in the same river twice."

—Heraclitus

Whenever your life seems unsettled, you are normal:

"A life that seems seamless from the outside feels like a patchwork quilt from the inside. You never just achieve something and hold it firm. You keep composing and recomposing your life."

—Ellen Goodman

It is when you doubt yourself the most that you will grow the most:

"It is what we think we know already that often prevents us from learning."

—Claude Bernard

Your most important accomplishments may not be easily measured by other people's standards:

"Measurement is profoundly useful, but it cannot tell us what makes life worth living. You cannot measure the good that you do."

—Ronald Heifetz

Stick to your ideals, regardless of the adversity:

"Be careless in your dress if you must, but keep a tidy soul."

—Mark Twain

Your purpose is not to make a living for yourself; it is to make a life for yourself:

"We make a living by what we get. We make a life by what we give."

—Winston Churchill

And, the most important one...never take yourself too seriously!:

"There isn't a Parallel of Latitude but thinks it would have been the Equator if it had had its rights."

—Mark Twain

At six thirty-seven a.m. I glanced at the "Peanuts" comic strip. Six thirty-seven a.m. is ingrained in me by eight years of Internship, Residency, and Fellowship. Just enough time to swallow (a high fiber?) breakfast before rushing to the 7 a.m. rounds, hopefully wearing matching socks. You might think that such a regimented schedule would in time give way to a less rigid timetable, but let me assure you that as a mature senior physician, my circadian sleep patterns still land me glancing at Peanuts at exactly six thirty-seven a.m.

That day's cartoon caught more than a glance. Snoopy was supervising the check out clerks at the supermarket. After greeting a couple of customers by their first name and performing such demanding tasks as providing price checks, he paused and sighed "seven more hours and 52 minutes of this! Augh!!!"

No profession is as removed from Snoopy's perception of his job as the practice of Medicine. You will face every morning the dying, the suffering, and the weirdoes. You will have to empathize, console, and sometimes merely tolerate. You will soon know who you can reasonably hope to cure, those for whom you will make life more tolerable by controlling their illness, and in some instances your job will primarily consist of helping your patients leave this world with dignity, always concerned with easing everyone's pain, regardless of the final outcome.

Because of the M.D. following your name, patients will disrobe as well as reveal to you their most intimate thoughts. Hippocrates realized the awesome responsibility of such power. Although more politically correct versions are now in place, the fundamental principles of the Hippocratic oath have endured over time and across cultures.

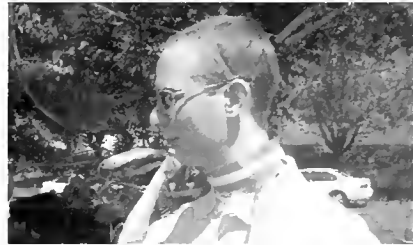

In Ancient Greece, physician was synonymous with philosopher, and this dual role often included a concern for the political issues of the day. At the beginning of a new century, you also ought to strive to be both healers and leaders in your community.

Finally, regardless of the pressures of the job and the demands on your time, try to find the proper balance between Medicine and family. That is where you will be at the end of an exhausting day so that the doctor is in, not only at the hospital or in the office but also at home where we all ultimately belong.

As every generation before you, there will be challenges with which your training has equipped you to deal. You are on your way to a difficult but glorious journey, and the ultimate reward is your capacity to heal. We have tried in the past four years to prepare you for that journey; I think you're ready.

So good luck and God bless.

Walter M. Roufail, M.D., Professor of Medicine/GI

Preclinical Years

*"I don't like the
perineum"
-Shadab Siddiqui*

Pre-clinical years = E-24 and G-28

How many of us sat in the same seat in E-24 for the majority of first year? How many of us levitated directly upwards into the equivalent seat in G-28 the following year? These two classrooms are the hub of our basic medical knowledge. In those darkened rooms we are introduced to an entirely new vocabulary and a volume of information few of us have known before. Sympathetic chain ganglion. Serratia anterior. Compensated metabolic acidosis.

Our backs ache by the third lecture of the morning and we inch closer to the vending machines with each break. From those rooms we radiate out into small groups, into DPR, towards the lab or to the bathroom.

We do *a lot* of learning.

Some about medicine.

Some about teaching.

And a fair amount about ourselves and those around us who share this goal as we mingle in the lounge waiting for one of the microwaves or in the fish bowl to print lectures or catch a nap.

We are embryo doctors, comfortably familiar with the weave of our grey chairs and the creak as we stretch back, but still disoriented and anxious when we venture into the towers of the hospital surrounding us.

Written by Megan Austin

The Clinical Years

We own white coats from the first week of medical school but they stay light and clean, with maybe a Maxwell's adorning the pocket or a penlight or a pad for notes. It isn't until the start of third year that the pockets are stretched by our accessory brains- a PDA, a Sanford, On Call, Pharmacopoeia—yielding a coat so heavy it could power a clock if hung and given a push. The collar grays and the sleeves darken. From a distance some coats even look yellow.

Thoroughly armored, we begin to learn by doing, or as is often the case, by doing it wrong. Nebulous terms like “pertinent positives and negatives only” and “attending dependent” mingle in our brains as we desperately try to tease out the right thing to present. If only mind-reading capabilities could be purchased on-line. The neon covered “survival guide” strongly advises, “Do NOT forget the vitals!” Who would forget the vitals? Funny how that happens. Hopefully it was because they were stable.

Stable? WNL? Unremarkable? Noncontributory? Terms off-limits during third year slowly become permitted during fourth year. Aside from the ICU and Als, the coat is unloaded. No stethoscope is needed for Dermatology or Pathology. The reflex hammer becomes a dog toy. Suddenly it is possible to be off the wards long enough for entire sections of the hospital to move. “I thought the IMC was on 5 and since when are all the soda machines Pepsi?”

- written by Megan Austin

Student Groups

American Medical Association

The AMA Chapter advocates for the future of medicine and represents WFU medical students on pertinent medical issues. AMA is also involved locally with STEP and STATS as well as provides national representation in AMA-MSS conferences.

American Medical Students Association

AMSA is a student led national organization that addresses the concerns of physicians in training. AMSA provides many lectures that extend beyond the classroom to advocate for the improvement of world health, access to quality care, and social obligation in medicine.

American Medical Women's Association

AMWA strives to bring together female medical students and physicians to build meaningful professional relationships. AMWA offers lectures involving women in health care and the challenges women face in medicine. AMWA is also active in the annual Sisters in Science Program to promote women in medicine and science.

Asian Pacific American Medical Student Association

APAMSA seeks to bring Asian and non-Asian students together for educational, cultural, and community service activities. APAMSA strives to reach out to students to enable this minority population to support each other and educate the entire student body on Asian Culture.

Christian Medical and Dental Association

CMDA is an organization of Christian physicians, PA's, residents, and students whose mission is to motivate and educate Christians in the medical profession to glorify God. CMDA meets regularly for Bible Study as well as provides resources, networking, and opportunities for Christian Health Care Professionals

Emergency Medicine Interest Group

EMIG promotes interest in Emergency Medicine by providing contact with EM physicians and residents as well as various lectures and workshops designed to teach skills valuable in the ED. These include the ever popular suture clinic and airway management workshop.

International Health Group

The International Health Group aims to promote the improvement of world health, medical care for all, and an interest in medicine abroad. The organization extends beyond the classroom by promoting international health care, rotations abroad, as well as lectures involving health care across the world.

Military Medical Student Association

The Military Medical Students Association brings together the students involved in the various branches of the military services.

The group strives to provide information regarding military service and most importantly, the fourth year match process.

Operation Smile

Changing lives one smile at a time.

Operation Smile strives to raise awareness and money for the organization that provides hope for tens of thousands of children and young adults suffering from devastating facial deformities. The group teaches the values of caring, service, leadership, and education.

Pediatrics Interest Group

PIG is a student led organization designed to incorporate pediatric medicine into the first two years of medical school. The group provides such activities as volunteer work, physician shadowing, and involvement in the health fair to promote interest in pediatrics.

Surgery Interest Group

The Surgery Interest Group promotes student interest in surgery and the surgical subspecialties by providing educational opportunities such as lunch lectures and workshops as well as an opportunity for interaction with physicians in various subspecialties of surgery.

Student National Medical Association

SNMA is an organization of culturally diverse medical students that are dedicated to improving health care for the underserved. The organization aims to increase the awareness of minority health issues and encourage minority students to pursue a career in medicine.

Musical Talent

Say Ah's

Say Ah is an all female a cappella group composed of first and second year students. Members participate in weekly practices and venture out to the hospital wards to sing to patients. The Say Ah's also sing at various community gatherings such as the WFUSM Alumni Gala and other charity and public service events.

The Ultrasounds

The Ultrasounds are an all male a cappella singing group open to all first and second year medical students. The students regularly visit the hospital wards to sing and cheer up patients. The Ultrasounds also participate in a variety of public appearances including Dr. Martin Luther King, Jr. Day celebration and other charity events.

*"The only way to
keep your health is
to eat what you
don't want, drink
what you don't like,
and do what you'd
druther not."
- Mark Twain*

Congratulations

To the new M.D.'s !!

From your

**Parents,
Children,**

Spouses,

And

fRIENDS

"Making life a bliss complete." I am so happy to have you.
 Congratulations. Love, Shelby
 "(Erik's) that smart. Really? Let me put it this way; Plato, Aristotle,
 Socrates - all morons."
 Congratulations. Shauna, Aaron, Samuel, Jared, and James.
 "Intelligent? Sense of humor? He's got a good body but he doesn't
 have to look in the mirror every two minutes?" Erik. Erik. Erik also.
 Love, Sarah, Scott, Tessa, and Abel.
 "I know you can get the job, but can you do the job?" Good job,
 Love, Jacob and Halle.
 I am really happy for you. You are a great example to me.
 Love, Brett.
 He's tall, dark, handsome, and smart. What a guy!
 I love you, Rachel.
 Erik, you have joined a great brotherhood of healers that includes the
 Savior Himself.
 Congratulations. Love, Dad and Mom

Congratulations, Ashley!
 You chose to chance the
 rapids and dared to
 dance the tides... but,
 you will always be
 "Dr. Linda Jones."

Love, Mom and Dad

From the first day you were
 born we knew we were blessed.
 You are the light of our lives.
 There are no words to express
 what a thrill it is to be the
 parents of the very first Doctor
 in our family. Thank you for
 being you.

Love, Mom and Dad

*"You shouldn't
 be studying for
 a test, you
 should be
 studying for
 your patients."*

- Wade Wilkerson

Knowing what you would grow up to be,
 Was always, for you, a priority.
 Ability in math made it clear,
 That you could be an engineer.
 Mechanical Engineering day after day,
 Eventually caused you to say "No way!"
 "Medicine is what I ought to do."

And Wake Med extended its welcome to
 you

As a Doctor of Medicine, now you can,
 Join your siblings Ted and Ann

Healing those who are eager to see,
 That you have become what you wanted
 to be!

We are so proud of you
 Love Mom and Dad

Congratulations, Rupen!
 Every time we took you to your
 pediatrician, you would pull at his
 stethoscope. Finally, you now have your
 own stethoscope to play with.
 We are all very proud of you.
 Love, Mom, Dad, and Arpita

"Dream manfully & nobly, & thy dreams
 shall be prophets." Edward Bulwer
 We love you & are so very proud of you.
 Congratulations! Mom, Dad, and Sarah

Jamie M. Cheung

The birthday turkey has not grown but you sure have!

As the saying goes, "You've come a long way, baby!"

We are all so proud of you.

We know that the years ahead will be challenging but know that you will tackle them with determination and enthusiasm.

CONGRATULATIONS to the "real" DR. CHEUNG !!!

Love,

*Mom, Dad, Jennifer
Grandpa and Grandma*

Dear Becca,
All your hard work and
plans have paid off! We
have a doctor in the
house! We are all so
proud of you.
Congratulations and
love from your family,
Mom, Dad, Brian, Zack
and Toby

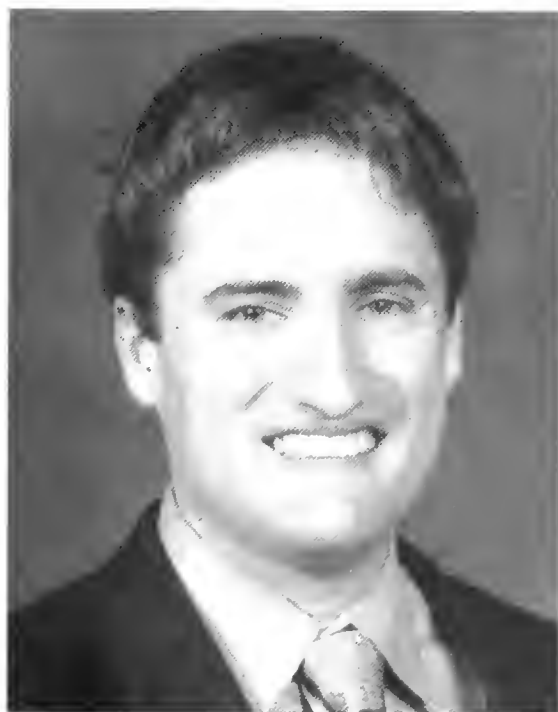

Dear Aaron,

To say that we are proud of you is just
not adequate. From age 5 you have held
fast to your dream of becoming a
physician and now you have realized it.
We pray that God will make you the very
best doctor possible: He has already
made you the very best son! May God
bless you in all you do, and may He
bless the patients He places in your care.

All our love,

Mom & Dad

*Imagine,
Dream,
Achieve.*

Congratulations, Mike

Love,

Mom and Dad

Kristin

Emily

MAY THE LORD GOD WHO HAS KEPT YOU, CONTINUE TO
BE WITH YOU, CAUSE HIS FACE TO SHINE UPON YOU AND

GEOFF:
GREAT STYLE - EXCELLENT PERSPECTIVE -
AWESOME ACCOMPLISHMENT!
YOUR LOVING FAMILY

*Congratulations Bryan
and class of 2005,
Love Dad, Mom, Steph
and Jeff*

We always knew you were not very bright!!! We love you Anyway - God Bless You as you begin your career as a Doctor

Mom, Dad, Debi, Teddy, Jacob, Ashley & Alex

*In our daughter's eyes we
see such light.
We see the future so bright.*

*Jessica,
For all the light, love,
compassion
And healing you give to the
world,
We thank you.*

*Love you so much,
Mom and Dad*

Jessica,

As you harvest the fruit of four years
Of blood sweat and tears, I have such pride
In my heart as I think of what you have put in to be
here.

I know that as you look back on these four years
You will have the same feeling of pride and
accomplishment that we have
looking at you.

Medical school is the foundation that you will build
upon to be the best
Doctor you can be for as many people as possible. I
and all your future
patients will forever be grateful for the path you
have chosen.

From a husband and a lifetime patient that will
always love you.

Michel

*Megan, you've always been such a
positive force in my life. It gives
me great satisfaction to see you
entering a profession where you
can work so much good in the lives
of others.*

*I love you so,
Achukma e Mom*

Congratulations!

We love you

Dad, Mom, Matt & Mike

Congrats!

We're impressed and excited for you Matt.
You knew what you wanted to do and did it.
Of course, your accomplishments really raise
the bar for the rest of us, but there isn't
anyone else's example we'd rather follow.
Your brothers are proud of you, and wish you
nothing but the best in your future endeavors.

Our love and respect,
Mark, John and Nate

Matt,

We are so proud of you! Not only for your
achievement but also for your determination,
dedication and focus on a goal that you set
for yourself many years ago. Your future
patients will be fortunate to experience your
gentleness and caring nature. As you begin
your residency, we wish you and Amy the
best and selfishly hope you can begin your
career closer to home.

We love!
Mom & Dad

Laughter is the best medicine.

Health is wealth.

Feed a cold and starve a fever.

An apple a day keeps the doctor away.

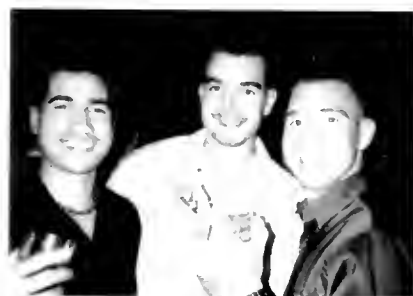

Early to bed and early to rise, makes a doctor healthy, wealthy and wise.

After supper, walk a mile.

Have some chicken soup and call me in the morning.

Congratulations for accomplishing your goal. Use each day as a learning experience. Above all, be *honest* and *respectful*.

All our love,
The Tu Family

Ivan, we are so proud
of you. All the hard
work and sacrifice you
made, to get you where
you are today. Thank
you for being one of
the finest sons, brothers
and uncles one could
ever wish for. Best of
luck in the future. God
Bless You.

Love,
Mom, Dad, Cesar, Mike,
Lily Cammy and
Halie.

*"I can do everything through Him who gives me strength".
Philippians 4:13*

**You did it, Dr. Handler!
Congratulations! We are so proud of
you! Much love and blessings!**

*But those who wait on the Lord shall renew their strength;
they shall mount up with wings like eagles, they shall run
and not be weary, they shall walk and not faint.*

Isaiah 40:31

Dear Aaron,
Your childhood dream was to become a doctor. All
your hard work and determination made your dream
come true. Thank you for letting us be a part of your
dream.

Love from your very proud family,
Mom, Dad & David

*You were always the boy on the go with high aims and steady footfalls. You were always
the boy who feared nothing and wanted to do everything. And look at where you are now
– on the brink of stepping into your dreams. We have never been more proud of you than
this moment. We can't wait to see where your dreams will lead you and we wish you an
incredible journey always.*

Love,
Mom, Dad, and Mary

Daughter, Sister and Wife Extraordinaire

Thank you for dedication to excellence with family, church, education, career, sports and enduring friendships. Your Family is proud of you

Congratulations, Dr. Josh! Looks like AP bio class paid off! We are proud of you and love you!

Love,

Mom, Dad, and Finley

"But those who hope in the Lord will renew their strength. They will soar on wings like eagles; they will run and not grow weary, they will walk and not faint". Isaiah 40:13

Sam you have run a good race and I am honored to be in your life.
Congratulations! I love you,
Kristen

Another touchdown,
Bryan and we couldn't
be more proud! As
always, we love you,
Dad and Ma

Wade Richard Wilkerson

Wade, our Lord has chosen you to serve in the field of medicine
May He use you to help bring His healing to others, and
may all that you do bring honor and glory to Him.

We love you very, very much!!!

Laura, Mom and Dad, Anna, Emily, and Scott

With great pride, we congratulate you
Your loving family
May 16, 2005

KELLY SUSAN HOPPER

FROM DIRT...

TO DANCE...

TO DOCTOR

When you were born we thought you were someone special...

And we still do!

We're so proud of the person you've become.

May all of your dreams come true.

We love you.

Mom, Dad, Jeff, and Grandparents

What should I be, a tennis player
or a doctor? Maybe a doctor.
Good Luck Oliver, whatever you
chose.

Mom, Daddy and Anca

We are very proud of
you. I guess your
determination and
stubbornness comes from
us. We are proud to say
you are our daughter.

Love,
Mom and Dad

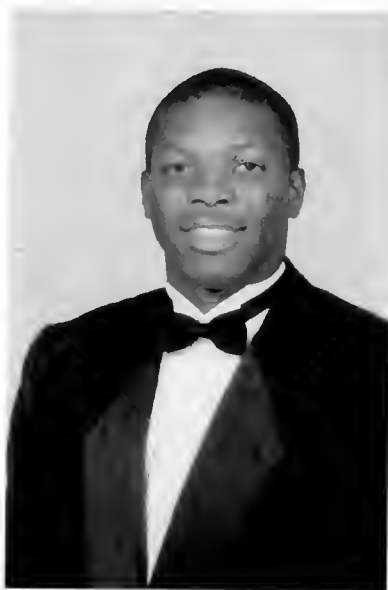

You have worked hard, played hard,
and loved lots. Look at what you
have accomplished. Congratulations,
Daddy and Doctor! We could not be
more proud of you!

We love you!

Betsy, Molly, Lilly, & Jake

**Sam, you have labored
long and hard to achieve
your goal. We applaud you
for your determination.
We thank God that He has
allowed us to be the
parents of such an
extraordinary young man.
We are extremely proud
of you.**

**We love you!

*Look out world, here they come!
Josh, Wade, Kelley, Geoff, Wood...
Congratulations!!!*

***You've come a long
way...
We are very proud of
you.
Love,
Mom, Dad and Poja***

From your birth
in 1977 to now, we
have always
been proud of
you. God bless
you – our own,
Dr. David Rogers.
Love from your
family

Dear Jeff:

Your Mother and I are so proud of you. You have set out a very difficult goal for yourself, you have strived to do your best and you have accomplished that goal with very admirable achievements.

In life, we are to take the gifts that God has given us and give it our best to use them. You have done that. You have always been a compassionate, loving, caring, loyal person with great tenacity to accomplish what you set out to do. You have chosen a profession that will encompass your natural gifts and use them to benefit those with whom you come in contact. We ask God's blessing upon your future endeavors that you may continue to bless others as you have been blessed.

We love you and we are proud of you.

Dad and Mom

What an immense power over life is the power of possessing distinct aims. We are proud of your accomplishments. Dr. Reginald Brown and we know your grandfather, Dr. Melvin W. Mason, would be proud too.

Love Mom, Dad and your 4 brothers

To Carrie, who shows such an abundance of grace to others, who lives with great courage, and who demonstrates a deep faith. You and these attributes are an example to us all. We are so proud of you! Congratulations! May God richly bless you through your ministry of medicine and in all you do.

Wishing you continued success

May all the talents and
 Gifts you now possess
 Touch the lives of
 All you come to know

SHAD,
 Congratulations on all
 your accomplishments.
 Continue to reach for
 the stars.

Love,
 Your Family

A big green truck
 You hoped to drive
 When you were only four

And now for all
 that you will meet
 You'll be doing so much more

Binit,
Congratulations!
We are proud of you.
Mom, Dad, Aalok, Ami

Congratulations Kenny! We
 are so proud of you for all
 your hard work and
 everything you have
 accomplished. Your dream of
 becoming a doctor has come
 true, and now with God's
 help and guidance you will
 make a difference in a
 wounded, but healing world.
 We love you very much.
 Dad, Mom and family

Congratulations Kelly!

We're proud of you.

Love,

Mom and Dad

Tad,

As parents, we are blessed to have a son who is so caring, giving, and loving not only to your family, but to others as well. You are a wonderful brother and friend. Your marriage to Laura, our grandchildren, and now graduating from medical school have made us very proud.

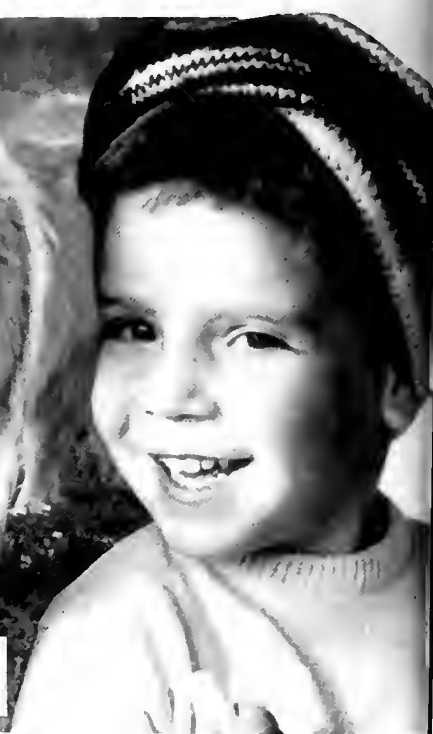

We love you

Mom, Dad, and Dawn

You've come a long way baby! Love you, Mom & Dad

Dino Peter Massoglia MD PhD

*Since Pooh was
your first friend, he
too congratulates
you on this special
day*

*i Love you. YOUR
faithful 4 Legged
companion,
~ HOLLY*

Brad, Congratulations! I love you big
bro ~ Ashley.

Dearest Brad, from the time you
were very small, I always said you
had hands of a surgeon. You've made
us extremely proud of you
accomplishments and the person you
have become. I could not be any
prouder. God bless you and your
hands as you help mankind. I love you.
~ Mom

Brad, I am sure that I cannot adequately
express the pride I feel in watching my
child and my friend achieve his medical
degree. Witnessing you achieve your
dreams has been very rewarding to me as
a parent. You are the first doctor in our
family and we are all so proud! Watching
you develop over your lifetime has taught
me a lot. The son can teach the father as
well as the father can teach the son. Your
patience, thoughtfulness and pursuit of
quality in your work and in your life has
had an impact on me. I hope that in many
small and in some large ways, that I had
some influence on the fine man that you
have become. Congratulations Doctor – I
love you son! ~ Dad

*I'm glad you are
doing what makes
you so happy.
Congrats on all
your hard work
you have put in.
and thanks for
providing me any
medical info
whenever I needed
it. ~ Brent*

*Being my first
grandchild, I am
most proud of your
accomplishments.
All my love.
~ Mimi*

Congratulations

Bravo! Super!

Fantastic!

we're proud of you!

WE'RE PROUD OF YOU!

Mom, Dad, Grandma, Kim, Michelle, Jenny Susan, Sr. Barbara, Johnathan, Josh, Aunt Tootsie, Pat, Bea

*May God continue to Bless, Protect
and Guide a special person and
precious daughter. Your being has
always been and will always be a
miracle and a gift to your parents.
Time and life's passages will never
change this.*

*Congratulations and praise the
LORD! You earned it!!
Allison Burke is an MD!*

Matt,

We rejoice with you on
Fulfilling your dream of becoming
a doctor. May God use your skills
to restore hope and health to many.

MTATNITW
Mom and Dad

*The LORD bless you and keep
you; The
LORD make his face shine on you,
and
Be gracious to you; The LORD lift
up His
Countenance on you and give you
peace.*

Numbers 6: 24-26

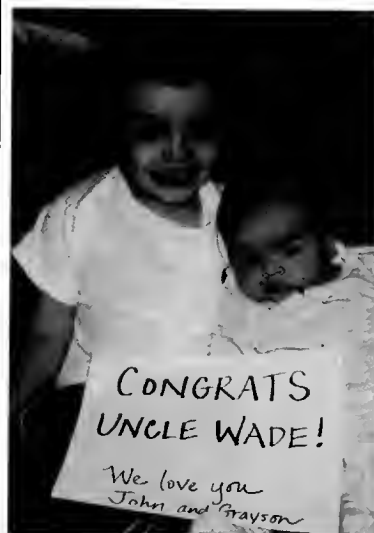

Congratulations,

Dino!

*I am so proud of
you!*

I love you!

Lola

SAKEITHA - meaning BRAVE.
 "Trust in the Lord with all your heart
 and lean not on your understanding;
 in all your ways acknowledge Him,
 and He shall direct thy paths."
 Proverbs 3:5-6. when God gave us
 your name at birth, He had your
 destiny in mind.
 Love always
 Dad, Mom, Brother and Jasper

*Congratulations
 Class of 2005!*

Thank You From the Editors.....

We would like to thank everyone who helped make the 2005 Gray Matter possible this year. We couldn't have pulled this off without you!!!

- Becca and James

Thank you to **Latasha Sellers** and **Collin Lynn** for writing the Yearbook Dedication and the Acknowledgements pages.

Thank you to **Megan Austin** for writing the Introduction, Clinical Pages, and the Pre-Clinical Pages paragraphs.

Thank you to **Suzanne Steele** for collecting, organizing, scanning, and basically taking care of all the fourth year pages photos.

Thank you to **Saurabh Singh** for organizing and taking all the Student Interest Group Photos.

Thank you to **Tom Feely** and **Dave Rogers** for collecting all the poems, sayings, and quotes that are found throughout the yearbook.

Thank you to **Melissa Keene** for organizing the Awards for Teaching Excellence, House Officer Teaching Awards, Faculty Recognition Award, and the Charles B. Clark Memorial Award pages.

Thank you to **Rick Ochoa** for being the Physician Assistant Student-Medical Student Liaison.

Thank you to **Brendan Tu**, **Elizabeth Lundeen**, and **Jason Hong** for the candid photos, pictures of social events, and pictures of the House Officers.

And a Special Thank You to **Sara Nelson** for being the photo hound, keeping all the photos while we were out of town, and generally keeping us sane while we were working on this yearbook!

And a Very Special Thank You to the Fourth Year class and everyone who sent in candid photos for the yearbook!

Colophon

The Gray Matter: Volume 61, was produced by the yearbook staff at Wake Forest University School of Medicine in Winston-Salem, NC and was printed by Walsworth Publishing Company in Marceline, MO. The account was serviced by representative Jo Ann Mount and Customer Service Adviser Alicen Edgar.

Cover: The cover was designed with the assistance of Jo Ann Mount of Walsworth Publishing Company. It is a Pearlescent Neptune Blue Tie Die with Whirlpool Grain and Matte Silver Hot Foil. The End Sheets are Smoke Gray with Black Ink.

Production: The books 250 pages are printed on Legend Gloss pound 80. The 2005 Volume includes 16 pages in full color. The *Gray Matter* was produced using PageMaker 7.1. All photographs were digital or were digitized. Tacky was used as the primary text font throughout the yearbook. Layouts were submitted to the plant and proofed via the internet.

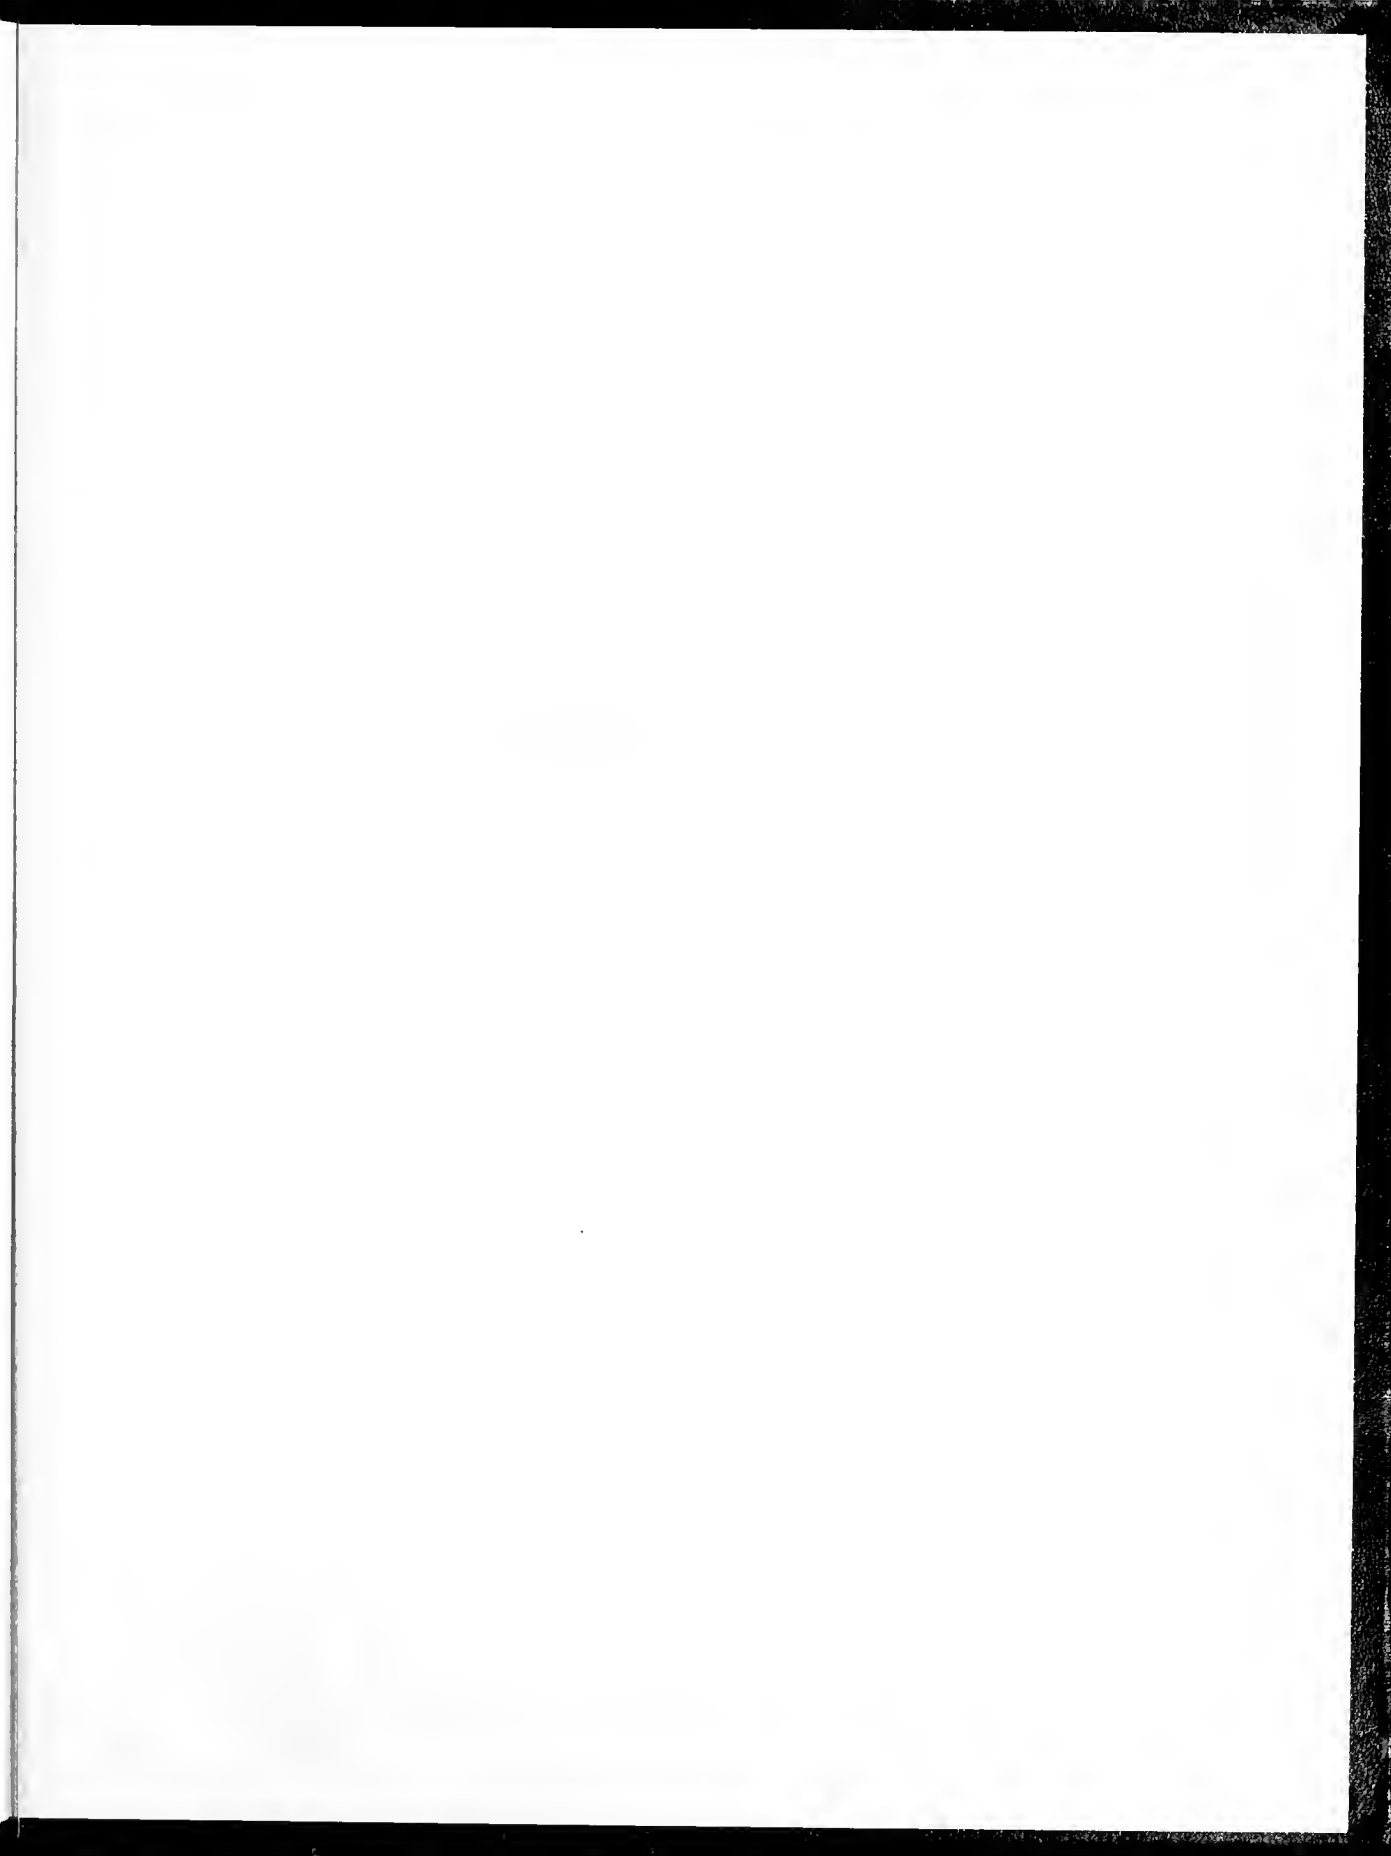

Photography: All portraits were taken by the Department of Biomedical Communications. Individual members of the Classes of 2005, 2006, 2007, 2008, Physician Assistant Program, and Graduate Studies Program provided candid photographs.

Advisers: Patricia Adams, M.D. and Lynn Snyder
